NPK 12-6-18

MINERAL COMPOUND FERTILIZERS FOR SPECIFIC CROPS OBTAINED BY PHYSICAL COMPACTION

The products of the K-SPECIAL LINE are complex mineral fertilizers that have been developed to provide a solution to the nutritional requirements of specialised crops: orchards, olive groves, vineyards, citrus groves, horticultural crops, hazelnut groves. These products have been created to provide the right amount of crop specific nutritional elements and a good availability of sulfur, calcium and microelements that should satisfy the basic nutritional requirements even of the most demanding crops.

The effectiveness of these products is improved by the granular formulation obtained through compaction, a dry granulation process borrowed from the pharmaceutical industry that uses mechanical compression to agglomerate the particles of the raw materials. This allows for granules to be obtained without adding solvents, which can have a negative impact on the final solubility of the product. The compacted granules rapidly dissolve in the ground allowing a fast nutrients' root uptake, making these fertilizers very efficacious. Low Chlorine Content (LCC/BTC) formulations are also available that couple all the advantages of the NPKs with the quality of Low-Chlorine Potassium (< 2%), which is the best quality of potassium.

NPK 12-6-18 is the fertilizer of the K-SPECIAL VIGNETO-FRUTTETO LINE recommended from the early cultivation stages until ripening. The high potassium content is balanced by the presence of nitrogen and phosphorus, ensuring a balanced plant vegetative development. It is ideal for all types of crops.

CROP	TIME OF APPLICATION			DOSE/HECTARE*	
Fruit crops e Grapes		Pre-transplanting/sowing fertilization, Post-transplanting/sowing fertilization			400-900 kg
COMPOSITION			PHYSICO-CHEMICAL FEATURES		
Total nitrogen (N)		12.00%	GRANULAR		
Ammoniacal nitrogen (N)		12.00%	METHOD OF USE	iiiiii QI	. 274772
Phosphoric anhydride (P₂O₅) total		6.00%		<u>07</u> .	
Phosphoric anhydride (P_2O_5) soluble in water		4.00%		Cover fertilization	Pre-sowing fertilization
Phosphoric anhydride (P_2O_5) soluble in neutral ammonium citrate and in water		6.00%	PACKAGING: 25 KG - PALLET 1500 KG, BIG BAG 600 KG		
Potassium oxide (K ₂ O) total		18.00%			
Potassium oxide (K_2O) soluble in water		18.00%			
Magnesium oxide (MgO) total		2.00%			
Sulfuric anhydride (SO₃) soluble in water		24.00%			
Boron (B) total		0.10%
